## Test Results

HTTP Status Code

✓ PASSED

HTTP 200

```
{
  "expected": 200,
  "actual": 200
}
```

## GraphQL Errors

✓ PASSED

No errors

```
{
  "errors": null
}
```

## Data Presence

✓ PASSED

Data present with systemEnergyStatsSummaryV2

```
{
  "has_data": true,
  "has_stats": true
}
```

## Schema Validation

✓ PASSED

All fields valid

```
{
  "field_validations": {
    "batteryToLoad": {
      "valid": true,
      "reason": "Valid float",
      "value": "171",
      "expected_type": "float",
      "actual_type": "int"
    },
  },
}
```

```
"gridConsumed": {
  "valid": true,
  "reason": "Valid float",
  "value": "394",
  "expected_type": "float",
  "actual_type": "int"
},
"gridToBattery": {
  "valid": true,
  "reason": "Valid float",
  "value": "159",
  "expected_type": "float",
  "actual_type": "int"
},
"gridToLoad": {
  "valid": true,
  "reason": "Valid float",
  "value": "234",
  "expected_type": "float",
  "actual_type": "int"
},
"outagesServed": {
  "valid": true,
  "reason": "Valid string",
  "value": "0 Mins",
  "expected_type": "string",
  "actual_type": "str"
},
"pvExported": {
  "valid": true,
  "reason": "Valid float",
  "value": "0",
  "expected_type": "float",
  "actual_type": "int"
},
"pvProduced": {
  "valid": true,
  "reason": "Valid float",
  "value": "142",
  "expected_type": "float",
  "actual_type": "int"
},
"pvToBattery": {
  "valid": true,
  "reason": "Valid float",
  "value": "35",
  "expected_type": "float",
  "actual_type": "int"
},
"pvToLoad": {
  "valid": true,
  "reason": "Valid float",
  "value": "107",
  "expected_type": "float",
  "actual_type": "int"
},
"savings": {
  "valid": true,
  "reason": "Valid string",
  "value": "Rs. 3,986",
  "expected_type": "string",
```

```
    "actual_type": "str"
  },
  "solarSelfConsumed": {
    "valid": true,
    "reason": "Valid float",
    "value": "142",
    "expected_type": "float",
    "actual_type": "int"
  },
  "storedEnergy": {
    "valid": true,
    "reason": "Valid float",
    "value": "194",
    "expected_type": "float",
    "actual_type": "int"
  },
  "treesPlanted": {
    "valid": true,
    "reason": "Valid integer",
    "value": "4",
    "expected_type": "int",
    "actual_type": "int"
  }
},
"errors": []
}
```

## Response Time

✓ PASSED

Response time: 0.772s

```
{
  "response_time": 0.772,
  "threshold": 5.0
}
```

## Numeric Range Validation

✓ PASSED

All numeric values  $\geq 0$

```
{
  "validations": {
    "batteryToLoad": {
      "value": 171,
      "valid": true
    },
    "gridConsumed": {
```

```
    "value": 394,
    "valid": true
  },
  "gridToBattery": {
    "value": 159,
    "valid": true
  },
  "gridToLoad": {
    "value": 234,
    "valid": true
  },
  "pvExported": {
    "value": 0,
    "valid": true
  },
  "pvProduced": {
    "value": 142,
    "valid": true
  },
  "pvToBattery": {
    "value": 35,
    "valid": true
  },
  "pvToLoad": {
    "value": 107,
    "valid": true
  },
  "solarSelfConsumed": {
    "value": 142,
    "valid": true
  },
  "storedEnergy": {
    "value": 194,
    "valid": true
  }
},
"errors": []
}
```

## String Format Validation

✓ PASSED

All strings properly formatted

```
{
  "validations": {
    "savings": {
      "value": "Rs. 3,986",
      "valid": true,
      "reason": "Valid format"
    },
    "outagesServed": {
      "value": "0 Mins",
      "valid": true
    }
  }
}
```

```
    },  
    "errors": []  
  }  
}
```

## Integer Field Validation

✓ PASSED

treesPlanted: 4 (valid)

```
{  
  "value": 4,  
  "type": "int",  
  "is_valid_int": true,  
  "is_positive": true  
}
```

## Response Data Validation

| Field Name           | Value  | Expected Type | Actual Type | Status     |
|----------------------|--------|---------------|-------------|------------|
| <b>batteryToLoad</b> | 171    | float         | int         | ✓<br>Valid |
| <b>gridConsumed</b>  | 394    | float         | int         | ✓<br>Valid |
| <b>gridToBattery</b> | 159    | float         | int         | ✓<br>Valid |
| <b>gridToLoad</b>    | 234    | float         | int         | ✓<br>Valid |
| <b>outagesServed</b> | 0 Mins | string        | str         | ✓<br>Valid |
| <b>pvExported</b>    | 0      | float         | int         | ✓<br>Valid |
| <b>pvProduced</b>    | 142    | float         | int         | ✓<br>Valid |

| Field Name               | Value        | Expected Type | Actual Type | Status            |
|--------------------------|--------------|---------------|-------------|-------------------|
| <b>pVToBattery</b>       | 35           | float         | int         | ✓<br><b>Valid</b> |
| <b>pVToLoad</b>          | 107          | float         | int         | ✓<br><b>Valid</b> |
| <b>savings</b>           | Rs.<br>3,986 | string        | str         | ✓<br><b>Valid</b> |
